

Income Needed to Qualify

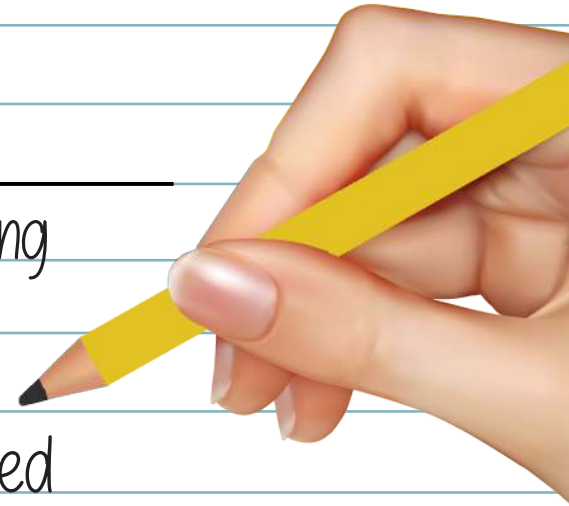

Exp.

\$720/mo Mobile Home Payment

+ \$800/mo Space Rent

\$1520/mo Monthly Housing

Monthly Housing \div 35% = Income Needed

$\$1520 \div 35\% = \underline{\$4628/month}$

Using 35% - 38% will show an estimated income range needed to qualify, however, income below the range may also work based on other circumstances. This is just a ballpark estimate
